"Plague, but not exceptionally life-threatening." Diseases in the Etruscan Brontoscopic Calendar and their social implications

Hilary Becker (Binghamton University)

Caveat emptor: the perils of treating disease in the ancient market place

Elisa Groff (University of Exeter)

"For women not in love don't conceive very often". Causes and treatments of sterility in both men and women according to Aetius of Amida

Elizabeth Craik (University of St Andrews)

Understanding Malarial Disease

Maria A. Spyrou (Max Planck Institute for the Science of Human History, Jena)

Aida Andrades Valtueña, Marcel Keller, Michal Feldman, Alexander Herbig, Kirsten Bos and Johannes Krause

Identifying plague in the ancient world: a molecular approach

Michael E. Habicht (University of Zurich and Flinders University)

Francesco M. Galassi (University of Zurich), **Sidney Senti** (University of Zurich),

Frank J. Rühli (University of Zurich)

Egyptian Canopic Jars as a resource for paleopathology: a hundred year-long quest

Roberta Ballestriero (Gordon Museum of Pathology, London)

Ex-votos between spirituality and superstition: depiction of diseases in ancient times

Francesca Bertoldi and Daniella Cottica with

V. Giacometti, D. Penzo, C. Bassani (Università Ca' Foscari, Venice)

Palaeobiology and palaeopathology of a Late Antique human sample from Verona, Italy

Vivien Shaw (Bangor University)

Body organisation and acupuncture in Han Dynasty China

Paula Veiga (University of Munich)

Establishing a connection between some plants as ingredients for treatments in Ancient Egypt (c. 3000-700 BC) and their 'divine' origin

Michael E. Habicht (University of Zurich and Flinders University)

Francesco M. Galassi (University of Zurich), **Frank J. Rühli** (University of Zurich)

The mummy of Alexander the Great - a speculative reconstruction

Pawel Madejski (Maria Curie-Skłodowska University, Lublin)

When history meets medicine: collective madness and Roman history

Katherine D. van Schaik (Harvard University and University of Zurich)

Towards a new(-ish) taxonomy of disease: disease classification and the interpretation of ancient textual sources

Rupert Breitwieser (University of Salzburg)

Plague and Province

Stefan E. A. Wagner (University of Erlangen)

Antonio Vinci (University of Milan)

The invisible enemy: diseases as a decisive factor in the wars of antiquity

Enrica Zamperini (University of Padua)

The Prometheus' disease

Francesco M. Galassi (University of Zurich)

Michael E. Habicht (University of Zurich and Flinders University), **Frank J. Rühli** (University of Zurich)

Open historical questions and unresolved philological aporias in the pathobiographical scholarship on Alexander of Macedon (356-323 BC)

Gabriel Lombardi (University of Buenos Aires)

Cecilia J. Perczyk

The hallucination in Euripides' Orestes

Rebecca Fallas (Open University)

Infertility and health in the Hippocratic Corpus

Tomáš Alušík (Charles University of Prague)

Before Hippocrates: disease and medicine in Greece from prehistory to 500 BC

Philip Straub (Albert Ludwigs University, Freiburg)

Contemporary explanatory models for causes of diseases in ancient Greece and Rome
